A propos

Senior BI Consultant with 10+ years of experience in designing, developing, and optimizing business intelligence solutions for Agro-food, Housing, Manufacturing, and Training sectors. Qlik expert (Sense, Cloud, View) certified as Qlik Data Architect and Microsoft Power BI (PL-300). Specialized in BI project management, data modeling, Qlik architectures, and reporting industrialization. Full BI lifecycle expertise: scoping, modeling, development, Cloud migration, production deployment, and user training. Cross-functional coordination between business, IT, and partner teams with proven ability to modernize BI infrastructures and automate large-scale reporting.

Domaines de compétences

BI Project Management & Cross-Functional Coordination

Expert in leading complete BI projects with commitment to deadlines, deliverables, and stakeholder coordination. Scoping, planning, prioritization, workload tracking, and risk management in Agile environments. Gathering and formalizing business requirements with translation into operational decision-support solutions. Facilitating project committees and weekly progress meetings. Supervising developments with quality assurance of deliverables. BI coordination between business, IT, and partner teams with participation in scoping and requirements gathering phases. Contributing to architecture decisions and Qlik best practices. Functional testing follow-up and secured production deployment support. Training and upskilling 150+ users with creation of training materials and change management support.

Qlik Expertise & Cloud Migration

Expert in designing, evolving, and maintaining multi-directional Qlik application portfolios (finance, marketing, operations, customer relations, legal) with 40+ managed applications. Complete mastery of Qlik Sense, Qlik Cloud, and QlikView with Qlik Data Architect certifications. Specialist in complete migration from Qlik Sense on-premise to Qlik Cloud: application identification, volume analysis, extension verification, Qlik Data Gateway installation, connection creation, Active Directory import, script adaptation, Section Access reconfiguration, Cloud model optimization. Industrialization through automation setup for reloads and application layering (extraction, transformation, delivery). Creation of monitoring applications and reporting via Qlik Reporting (tabular/Excel). Direct impact on 500+ business users.

BI Modeling & Performance

Expert in modeling complex data from heterogeneous sources (SQL Server, Dynamics, SharePoint, PostgreSQL). Design and optimization of Qlik data models with star schema structuring (fact and dimension tables). Load script optimization and reload time reduction. Development of advanced operational and financial indicators: temporal analysis (Year vs LY, Month vs LM, YTD), rolling forecast, variance analysis (actual vs budget/forecast), cash-flow, profitability. Large-scale automated reporting setup (130+ residences) via NPrinting with Excel/PDF report generation and automatic distribution. Governance, security (Section Access), and scheduling. Creation of analytical measures in DAX for Power BI. Data quality control with anomaly identification.

Compétences techniques

BI Project Management

BI project management, Scoping and requirements gathering, Planning and prioritization, Risk management, Project committee facilitation, Business/IT team coordination, Agile/Scrum, Functional testing follow-up, Change management, User training

Qlik Expertise

Qlik Sense, Qlik Cloud, QlikView, NPrinting, Qlik Reporting (Tabular), Qlik Data Gateway, Section Access, Scheduling, Qlik Administration (licenses, user rights)

Migration & Architecture

Qlik Sense to Qlik Cloud migration, BI industrialization, Layered architecture (extraction/transformation/delivery), Reload automations, Monitoring applications

Modeling & Performance

Data modeling (star schema), Data model optimization, Load script optimization, Reload time reduction, DAR method (Dashboard/Analytics/Reports)

Business Intelligence

Power BI (PL-300 certified), DAX, Power Query, SAP Business Objects, KPI and indicator development, Dashboards, Data visualization, Automated reporting

Data Management

SQL Server, PostgreSQL, MySQL, Talend (ETL), Microsoft Dynamics, SharePoint, Data quality, Consistency control, K4 (budget entry)

Governance & Security

Data Governance, Access rights management, Section Access, Data security, SSIS

Education

Microsoft

Microsoft PL-300 Power BI Data Analyst Associate Certification

Qlik

Qlik Data Architect Certification

École Centrale Paris

Specialized Master's Degree in Information Systems Management

2013

Châtenay-Malabry, France

ESIEE Management

Master's Degree in Management and Information Systems

2009-2012

Noisy-le-Grand, France

Lycée Turgot

BTS Computer Science - Application Development

2007-2009

Paris, France

Lycée Hector Berlioz

2007

Vincennes, France

Experience

Intersnack (Agro-food)

Fixed-price engagement

BI Project Manager

Intersnack - BI project management and delivery under Qlik Cloud for management control with commitment to deadlines, deliverables, and stakeholder coordination.

- Complete BI project management under Qlik Cloud with scoping, planning, prioritization, workload tracking, risk management, and weekly project committee facilitation in Agile environment
- Business requirements gathering and formalization (management control) with design and validation of financial management data model including advanced financial indicators (Year vs LY/Month vs LM/YTD temporal analysis, rolling forecast, actual vs budget/forecast variance analysis, dynamic period-end projection)
- Replacement of 5 manual Excel reports with industrialized Qlik applications including development supervision, deliverable quality assurance, and secured production deployment
- Training of 3 key users (management control) with change management support and estimated reduction of 2 to 3 man-days per month in reporting production

Qlik Cloud, Office 365, SharePoint, Teams, Financial analysis, KPI

Aegide / Domitys (Senior Housing)

2021 - 2025

Qlik Expert

Aegide / Domitys - Maintenance, evolution, and modernization of a decision-support portfolio of approximately 40 Qlik applications. Migration from Qlik Sense Enterprise to Qlik Cloud.

- Design, evolution, and maintenance of multi-directional Qlik application portfolio (finance, marketing, operations, customer relations, legal, quality, hospitality) with modeling of data from multiple source tools and creation of operational/financial indicators via DAR method (Dashboard/Analytics/Reports)
 - Complete migration from Qlik Sense on-premise to Qlik Cloud with Qlik Data Gateway installation, connection creation, Active Directory import, script/Section Access/design adaptation, Cloud model optimization, and industrialization via automations and layered architecture (extraction/transformation/delivery)
 - Large-scale automated reporting setup (130 residences) via NPrinting with Excel/PDF report generation and nationwide automatic distribution. Creation of monitoring applications and reporting via Qlik Reporting (tabular/Excel)
 - Qlik administration with license management, user access, Section Access, and scheduling.
- Cross-functional IT/business coordination with Agile/Scrum ritual participation and testing follow-up. Direct impact on 500+ business users

QlikView, Qlik Sense, Qlik Cloud, NPrinting, Qlik Reporting, SQL Server, PostgreSQL, Office 365, SharePoint, Teams, Microsoft Dynamics, Agile, SCRUM

CDC Habitat (Social Housing)

2019 - 2021

BI Consultant

CDC Habitat - QlikView application development for property portfolio management.

- Design and maintenance of QlikView dashboards dedicated to property portfolio management with load script development and business indicator creation (occupancy rate, fill time, asset management,

accommodation statistics)

- Visualization creation (KPI, combined charts, scatter plots, waterfall charts, objective/budget gauges, pie charts) with Talend extraction and data quality control
- Automated NPrinting Word reporting setup with scheduled automatic distribution. Corrective and evolutionary maintenance with user ticket management and access rights administration

QlikView, NPrinting, SQL Server, Talend, ETL, Data Quality

Imerys (Manufacturing)

2019 - 2020

BI Consultant

Imerys - QlikView application optimization and maintenance.

- QlikView application maintenance with data model optimization and application performance improvement
- Budget entry tool implementation with K4 including entry interface creation and data recording in SQL Server
- Automatic missing value completion algorithm implementation with data consistency control application creation. Administration with user rights management and load configuration

QlikView, SQL Server, MySQL, K4, Data Quality, Algorithms

Training Organization (OPCO)

2014 - 2018

Reporting Manager

OPCO - Responsible for the delivery component in implementing a QlikView-based decision support system.

- Assessment of existing reports (SAP BO and SSIS) with participation in decision-support tool selection (QlikView selected)
- Requirements gathering and formalization with approximately 50 users including business needs analysis and QlikView dashboard creation dedicated to each business department
- Training of 150 users with training material creation and user support. Qlik administration with user rights management, licensing, and reload scheduling

QlikView, SQL Server, SAP Business Objects, SSIS, SharePoint, Training, BI Governance
